*SHORT TEXT INFO*

here, between and there. image, afterimage, imagination. layers of fragments - desperate parts of analogies. the exit is just another delusion to overcome.

*LONG TEXT INFO*

"THE MOMENT" is the result of an invitation, to build an installation for "INTERZONE" at wholstenholme project space UK. we primarily had the idea to create an ambiguous ambience, and therefore arrived with some sketches and parts of objects to be finished and additionally expanded and reflected through other objects that would be found within the urban range of liverpool. besides the usual all day troubles everything than came together almost automatically. even for the installation itself we found some gap – some wooden stairs besides the designated exhibition space. here, we thought, is where we have go. here is, where we could make it happen. we wouldn't mind the gap. we would use it as spring for "de-constructivist creation". and so we went. we grew the flimsy mixture of entities into a fragile piece. by doing so, somehow afterwards it seemed, some kind of abstract retrospective to the whole gedankenschmied-project idea had been released. reality became a dream became reality - and then became a movie.
